FINANCIAL AND COMMERCIAL.

TUESDAY, June 8-6 P. M. The relation of the imports to the exports as set forth in the statistics of commerce and navigation for the year 1868 shows that we have been accurmed to make too much allowance for the excess the former over the latter. The difference last was only forty millions of dollars. Near's that amount of government bends and American railway stocks were exported to Europe, so that the actual demand for specie to settle the balance of trade was remparatively small. The "bulls" a gold have made a great stir the present seaso 4 over the relamade a great stir the present at the street well large imports, but in contrasting the figures of the imports and exports at this, city it should not be forgotten that while Nr w York is the great entrepot for foreign goods and receives name tenths of the imports of 'he whole country, the xports go from every city and town and village on he seashore between the 'A. Croix and Rio Grande. The cotton factor in Che Aeston will ship direct from hat port to Europe, by A will order his foreign purthrough Ne, w fork. The record as preserved the bureau at Washington shows the extensive

The demand was quite irregular, however, and variously reported in different portions of While some were unable to lend at seven per cent at the close of banking hours, others found ulty in getting funds at that rate. The country semand is hardly large enough to create the present activity, and hence the suspicion of artificial influences in connection with the stock market. Commeral paper was inactive and rates had a tendency to a ittle wider range, the quotation being seven to nine per cent for prime double names.

fork during the year 1868. The commerce of South n ports has not been inferior this year to last, and ence, when the time comes to strike a balance, It ill be found that the fears which drove gold over

Foreign exchange was active and higher at the close, the prime bankers advancing their rates to 109% for sixty day and to 110% for sight bills. The demand for the steamer revealed a scarcity of bond and commercial bills. Bond bills have been entirely bsorbed, and the present equality of the quotation for five-twenties in Europe and this country preents a further supply. The steadiness of gold is opposed to a better supply of commercial oills. The owing was the range of rates:-Sterling, sixty lays, commercial, 108% a 109; good to prime bankers', 109% a 109%; short sight, 110 a 110%; Paris, mixty days, 5.22% a 5.16%; short sight, 5.16% a 5.13%; Antwerp, 5.22% a 5.13%; Switzerland, 5.22% a 5.16%; Hamburg, 35% a 35%; Amsterdam, 39% a 40%; Frankfort, 39% a 40%; Bremen, 77% a 78%; Prussian thalers, 70% a 71%. Governments were quiet and dull. At the opening

here was some realization in anticipation of activity money, but the buyers were numerous enough to prevent a decline of more than one-quarter per cent as compared with the closing prices of yesterday. The London quotation coming 80% and closing 80%, the feeling in the market improved and prices re-covered their lost ground. The home investment semand for bonds is quite active and general, as usual at this season of the year, and maintains prices at figures which leave no margin for export. A cal-culation will show that the quotation for 62's is exactly the same in New York and London. The narket closed firm, with a sudden advance upon the toon quotations, based probably upon the London discount rate. The following were the final dreet prices:-United States sixes, 1881, registered, 117 a 11714; do., coupon, 12114 a 122; do. five twenties, registered, 1161% a 117%; do. do., coupon, 1862, 122% a 1221%; do. do., coupon, 1864, 117% a 117%; do. do., coupon, 1865, 1183% a 1183%; do. do., coupon, 1865, new, 11934 a 120; do. do., coupon, 1867, 120 a 120%; do. do., coupon, 1868, 11934 a 120; United States ten-forties, registered, 16834 a 08%; do. do., coupon, 109% a 109%; currency

Southern securities were disposed to yield in the presence of the greater activity in money, and the endency was quite decided in the Tennessee new sends, which declined to 62%, and in the North Carolinas. The Treasurer of the State of Louisiana s given notice that the interest coupons on all constana State bonds will be paid as they mature on presentation at the Citizens' Bank of Louisians d at the Bank of America, in this city. Prices ollows:—Tennessees, ex coupon, 67 a 67元; do., iew, 63 a 63元; Virginias, ex coupon, 57 a 57元; do., new, 61 1/2 a 62; Georgia sixes, 83 a 83 1/4; do. sevena, 96 a 96%; North Carolinas, ex coupon, 60 a 60%; 60., new, 56 a 57; Louisiana sixes, 72 a 73; do. levee ixes, 66 a 66%; do. do., eights, 87 a 87%; Alabama eights, 100 a 101; do. fives, 66 a 67; City of Memphis

market for governments also improved and left no margin between the domestic and foreign quotation on which to make bond bills. The course of the premium is shown in the table:-

Clearing House time, and the rate for carrying ranged from seven to five per cent. In the afternoon the highest paid for carrying was four per cent, while a single transaction was recorded at "flat." This fact indicates a large short interest, but the Clearing House figures to-day show tittle desire to add to this side of the speculative movement. The disbursements of coin interest to-lay were \$199,455, The following is the report of the Gold Exchange

It continues in a demoralized condition after the recent successful demonstrations of the "bears." which, though directed against only two or three in attracting general attention to the expanded inquiries as to the stability of values. The speculative mind was in a retrospective mood to-day, and the stock list was run over with many a scrutinous eye in search of the se investments which were least likely to suffer should the demoralization of the

market continue. Hence the irregularity so visible in the fluctuations of the market. The Vanderbitt with a runor of the severe with a runor of the severe trained of Ar. W. H. Vanderollo and Ar. Von Contral fell to 18814, but reacted to 1911, off extreme quotations. The mark et twice drooped to about the lowest quotations of yesterday, but closed with a rather cheerful feeling. Michigan Southern declined to 107% and Rock Island to 118%. The strongest stocks were Fort Wayne, which sold at 153, and Pacific Mail, which advanced as high as 83%. The weakest was Maripose proferred, which fell to 50 from 44, which lafter price was a decline from 51. The common stock could not be quoted. The London Economist of May 20 intimates a possible reduction of the Bank of England rate of discount to four per cent. It says:—

The course of the discount rates this week has been gradually and steadily in the downward direction, and to ladge from appearances there will be ease in the general market for some little time to come. Some weeks have now elapsed since a foreign loan of any importance has been attempted on this market, and the effect which has been produced by the higher rates offered for deposits in bringing forward supplies for employment in the discount market has been this week increased by the hiberation of something over a million sterling, by the repayment of the capital of the East India Irrigation Company. The high position of the foreign exchanges again, since the advance in the market rates of discount, at the chief continental cities, has not only insured arrivals of builton going into the bank, by which the coin and builtion according to the last return, as stated likewise from other sources, has increased by £572,291, but has brought some gold from the Continent; and no doubt the superior class of commercial paper in this market is an attraction to some capitalists of the Continent, where, for the time being, money is so plentiful and the rates considerably below our own. The Bank of England return is sufficient evidence that the demand has been only to a small extent, while if further proof is wanting it is to be found in the fact that the rates for first class paper out of doors are a full one-quarter below the bank minimum. To-day the possibility of a move in the bank rate to four per cent has been spoken of as the basis upon which some operations have been entered into upon the stock markers, out so far the circumstance deserves but little attention.

was the sale of Clarenceville (L. L.) lots by Johnson their arrival on the ground, were furnished with a was proceeded with. Two hundred and sixteen lots had been offered and disposed of up to twenty min-utes past one o'clock, when the heavy shower that came on necessitated an adjournment, which was accordingly had to Monday, the 14th Inst., when the balance of the lots will be soid. The bidding throughout was animated and spirited, and the prices obtained most satisfactory, without extravagant appreciation. Before the auctioneers left the the party returning to the city at an early hour, gratified alike at their excursion and its results.

the party returning to the city at an early hour, gratified alike at their excursion and its results.

At the salesrooms in the city the dealings were light, comprising three lots of unimproved city property, a lease of eight lots up town "by order of the Sherifi." and a part of the Kingsland manor estate. Particulars of all of these sales are subjoined.

The renewal of activity in the real estate market, especially in suburban property, before noticed in this column, is so remarkable in its exhibition, after the prostration of the past couple of months, as to have provoked very general and extended notice. The following, from a late number of the Ecening Telegram, presents a fair view of the situation and its probable consequences:—Within a short period a very decided improvement is noticeable in the real estate market. The reactionary feeling which followed the culmination of the speculative excitement of the early spring, unduly stimulated by bogus sales, is passing away, having been met on the part of owners of desirable property by firmiles and a determination to hold their property over what they regarded would be a period of but temporary depression, until time permitted a clearer understanding of the general situation and prepared the way for its just and proper apreciation. The result thus far has justified their sagacity in this regard. Already has the feeling of doubt and timidity which checked investment in real estate a short time since begun to give place to reawakened activity. The present season being one in which suburban property takes the leading place in the market exhibits the most encouraging animation in that direction, and so much of its as is past the most gratifying results in the success which has attended the numerous large sales recently held. All of these, with rare exceptions, have taken place on the ground disposed of while the company assembled has been composed largely of substantial men seeking safe and profitable investment for their capital, or of those desirous of securing Cuba mancorondo, protong grades.

CHAMBER OF COMMERCE.

Eleventh Annual Report.

The eleventh annual report of the Chamber of Commerce of the State of New York for the year ending some volume of 250 pages, the first 100 of which are devoted to detailed reports of the regular and special meetings of the Chamber during the year, and the remainder of the book is occupied with exhaustive special reports on various branches of trade and sta-

The report giving a general review of the proceedings of the Chamber during the year is included, but from the very full reports of the various meetings the following list of some of the most important deliberations and recommenda-tions of the Chamber is gleaned. On May 2, 1868, a special committee, to which had been referred a let-ter from United States Senator Morgan upon the general subject of immigration, reported that the laws relating to the carriage of passengers, as enacted by the European governments, are well calculaws relating to the carriage of passengers, as enacted by the European governments, are well calculated to secure to emigrants to this country all the safety and comfort which can reasonably be claimed, and that the complaints arise not so much from an absence of proper regulations in the ports of embarkation as from gross violations of existing lawys the property of the committee recommended that negotiations be mintered into with European governments, especially with those of Great Britain and Germany, with the object of securing a more rigid observance of the laws referred to. On the 7th of May, 1885, Congress was memorialized to erect a new and more commoditions Post Office building to accommodate the important and increasing business of that department in this city. At the same meeting a long and interesting letter from the Chamber of Commerce of Geneva was read, which earnestly recommended in the interest of commerce the rapid contraction of the paper currency of the United States. George W. Binut was unanimously re-elected a member of the Board of Commissioners of Pilots for the term of two years at a special meeting, called for the purpose of holding such election, May 220, 1989. At the monthly meeting held June 7, 1889, a resolution was passed to the effect that a high tax on distilled spirits had been demonstrated a failure, and advising a reduction of the tax to fifty cents per proof gallon. A special committee of the Chamber waited upon the Chinese Embassy, then just arrived in New York, and were received by Mr. Burlingame with every mark of distinguished consideration. No meetings were held during the months of July and August, may the merchants being absent from the city. At the desire of the Chamber was appointed Nomember of the Chamber of the Wart Nowember of the Chamber of Commission were afterward declined lated to secure to emigrants to this country all the safety and comfort which can reasonably be claimed,
